

## Overview

---

Company: Keystone Energy Partners, LP  
Position: Web Developer / Applications Systems Analyst  
Location: Downtown Houston, Texas 77002  
Start Date: Immediate  
Salary: Negotiable – based on experience  
Email: [careers@keplp.com](mailto:careers@keplp.com)

Keystone Energy Partners, a small and growing privately-held wholesale energy trading company, is currently seeking a Web Developer / Applications Systems Analyst to provide support for its ongoing wholesale operational needs and expansion into the Texas retail power segment.

The ideal candidate will have outstanding website design, development and maintenance skills and a strong foundation in database application development and maintenance. This position will be primarily responsible for the ongoing functionality and development of Keystone's current and planned websites and other online needs. This position will also provide secondary support for a variety of database applications. Ultimately this individual will be responsible for supporting and developing Windows-based client server applications used in the day-to-day power trading and retail operations of both Keystone and its retail subsidiary, Kinetic Energy.

## Position Requirements

---

The successful candidate will be an individual capable of designing, developing and enhancing websites which have strong database interaction. The primary development tools currently utilized include PHP, Symfony and Drupal under an SVN version control system. Ideally, the chosen candidate will be well versed with these or equivalent products and be capable of designing visually pleasing yet user friendly web applications. The successful candidate should also have excellent interpersonal skills, pay close attention to details and will be capable of managing a broad variety of tasks with little to no supervision.

Position prerequisites / requirements include experience with the following: PHP and Symfony or equivalent; Web framework development; MVC; and LINUX.

Strong preference will be given to candidates with the following experience: SVN version control; Drupal; LAMP server administration; PowerBuilder; Sybase; SQL; database administration; Embarcadero; Windows; Microsoft Excel and Access; C++; and good communication skills.

## About Keystone / Benefits
